

Discovery Experts

Unlocking Value in the Discovery Process

Vertically Integrated Discovery Counsel

Pre-litigation Advising

We work directly with the Company's IT department and in-house counsel team to review document retention policies, create data maps, and propose sound information governance to best position the Company for future litigation.

Collections

We have expertise working directly with the Company's IT team to manage the collections process, often without the need to hire a collections vendor. Our process, from custodial interviews to collections, is efficient and painless.

Document Review

Our document review unlocks massive value in Company litigation. The cornerstone is our logical, non-linear analysis. We recruit and retain highly experienced and skilled attorneys who are proficient using Relativity to sort, cull, and review documents to maximize efficiency.

Privilege Logging

The industry standard is to pay first-pass reviewers to make unreliable privilege calls, then pay lead counsel law firms massive amounts of money to provide quality control. We can manage the entire privilege process from coding to logging with industry-leading accuracy, minimizing or eliminating clawbacks and dramatically decreasing cost.

Trial Prep

We can work with lead counsel to find and cull the best documents for deposition kits and review offensive discovery and co-defendent documents for strategic use in trial and factual development. We even provide remote trial support, manage exhibit lists, and beyond.

Protecting Your Company

Reduced Costs

Battle Tested Technology

Elite Lawyers

Innovative Workflows

Willing to Partner

We regularly partner with top law firms to provide eDiscovery expertise, efficiency, and major cost savings to clients.

Data Hosting With HG EDGE

Our reviewing attorneys work seamlessly with our project managers on our captive eDiscovery hosting platform on Relativity. Allowing us to host your data means we build institutional knowledge over time, creating more value.

Document review is different with us

Single, lean team of reviewers who have elite backgrounds and stay on the matter for its duration.

Rapid review speeds due to efficient workflows.

Tight feedback loops to ensure consistency and quality.

Collapsed review processes that allow us to conduct first and second-level responsiveness reviews that can actually be used for factual development, with a privilege triage.

Constant communication with lead counsel to validate our calls and ensure reviews track the strategic direction of the case.
